Developer Technical Exercise

Included files/assets:

- Data.csv

Exercise:

We would like you to design a simple web app that displays the list of sales from the data.csv file in a summary back to the user. The summary should be displayed in a method of your choosing.

We would like to see the best of breed techniques and industry best practice utilised.

Summary:

- Design the application, there are no barriers or limitations to the design
- Spend less than 4 hours on the exercise
- Microsoft web technologies should be used

Deliverables:

Please present your deliverables (source files/solution files, etc.) in a zip file and email to the agency. Please include your name in the zip file name {Your Name}.zip
